(IV) Explanation on Parts Composition Lists

- 1) Indication of composition of assembly.
 - A. The largeness of the letters used for part names are given in three sizes.
 - (a) The largest letters show the largest composition of parts. Therefore, the parts printed in the largest letters always include parts printed offset to the right, and also printed in medium-sized letters.

- (b) The parts printed in medium-sized letters always include parts printed in the smallest letters and offset to the right.
- (c) The parts printed in smallest letters and offset to the right are always included in the parts printed in medium-sized letters or largest size letters that are located above.
- (d) The parts printed in smallest letters and not offset to the right signify that these parts do not form any part of any assembly or sub assembly.

B. Indication of parts composition by spacing out between lines. In the case of an assembly or sub assembly consisting of more than 2 parts, the space between the parts forming the assembly or sub assembly and the other parts is widened, to clearly indicate the parts forming the assembly or sub assembly.
